

Make Your Own Edinburgh Sedan Chair activity

What you will need:

- Scissors
- Glue
- A ruler
- Colouring in materials (if desired)

Top tip:

If you would like to decorate your sedan chair, colour it in before cutting it out.

How to make your sedan chair:

1. Cut out templates A, B and C.
2. Using a ruler, fold template A along the outer black lines.
3. Fold tabs 1 and 2 to form the body of the sedan chair. You should now have a box shape.
4. Glue all tabs marked 1 and 2 to close the bottom and top of the box.
5. Using template B, glue one strip each to the sides marked 3. These are the sedan poles as pictured below.
6. Glue the tabs marked C to the sides of the box marked 4. These represent pole loops.
7. If you would like to decorate your sedan chair with patterned material or paper you can glue that on now.

You now have your very own sedan chair!
